

Open-source Text Editor

sf:: namespace of SFML libraries

- has a bunch of type definitions

typedef signed char Int8; } for example
typedef unsigned char UInt8;

- this is for consistency across platforms, especially for Microsoft Visual C++ & Clang

2/5/24 - Udemy CSS

to change image size "img {
height: 200px;
width: 200px;
}"

2/8/24 - Python File Read/Write

open() → returns TextIOWrapper file object
<class '_io.TextIOWrapper'>

- make sure to use import json on external json data

- when passing jinja keys through html they still require ""

{{ workout["exercise"] }}

With open("json-data.json", "r") as data:

json-string = data.read()

json.loads(json-string)
puts string in dict.

loads file as a string
can use replace()

json.loads

* side note: type() returns type
* side note - avoid distractions - minor ones can be costly time-wise!
* side note - avoid distractions - minor ones can be costly time-wise!

Ctrl + F5
run no debug
